Projects

Fit Tracker

[Github Link](#)

Apr 2024

- Developed a full-stack web application called Fit Tracker using the MERN (**MongoDB, Express.js, React.js, Node.js**).
- Designed and implemented user authentication functionality for secure access to the application.
- Utilized JSON Web Tokens (JWT) for secure user authentication and authorization, protecting user data and ensuring privacy.

Tech Stack : React.js, Express.js, Node.js, MongoDB, HTML, CSS

To-Do-List

[Github Link](#)

Feb 2024

- Leveraged **React.js** for building a modular and efficient user interface.
- Implemented features for adding, updating, and deleting tasks, ensuring optimal task management.
- Ensured a responsive design to guarantee an optimal viewing experience across various devices and screen sizes.

Tech Stack : React.js, HTML, CSS

Quiz Application

[Github Link](#)

Mar 2024

- Developed a Quiz Application using **Java Swing** for the user interface
- Integrated **JDBC** for **MySQL** database connectivity to store and manage quiz questions.
- Integrated email functionality to send quiz scores to users upon completion using Java Mail API.

Tech Stack : Java, Java Swing, JDBC, SQL

Certifications

Advanced React

Coursera

Apr 2024

Complete Web Development Bootcamp

Udemy

Jan 2024

Introduction to Hardware and Operating System

Coursera

Jun 2023

DSA Self-Paced

Geeks for Geeks

Jun 2023

Technical Skills

Languages: Java(Proficient), JavaScript, C++ (Familiar)

Technologies/Frameworks: SQL, React JS, Node JS, Express JS, MongoDB, RESTful Api, HTML, CSS, Bootstrap

Tools: VS Code, Postman, Vercel, Git, Github, Linux, IntelliJ IDEA, Render, Netlify

Relevant Coursework: Database Management System, Operating Systems, Algorithms, Computer Networks

Achievements

- One among Dean's top 10% students at university
- Solved over 600 problems on Geeks for Geeks ([Link](#))
- Solved over 300 problems on Leetcode ([Link](#))
- 5-Star Rating in Java on Hackerrank ([Link](#))
